

## INDEX for Volume - 3

**Note: This is not an exhaustive list or all-encompassing work. It is a small collection of the work I have done in the areas below to date (well, those that have been committed to writing). It is intended to help answer the question I continually receive, “where can I read about that?”**

**Peace – Dr. Paul Anderson**

SECTION	TOPIC	STARTING PAGE
Section 1:	Overview and Integrative Clinical Thinking	
	Overview and clinical thinking in chronic illness	1
	Scheduling therapies	14
	Describing potential adverse events of therapies	16
	Variable Nutrient Dosing (also see examples after the IV section in Section – 7)	17
	Dr. A Treatment outlines and flow	19
	Healing or Disease “Crisis”?	23
Section 2:	Assessment, Laboratory Testing and Evaluation	25
	Immune deficiency work up	25
	Steroid effect on TSH	28
	Neutrophil to Lymphocyte Ratio	29
	25(OH) and 1,25(OH) D3	30
	Pyroluria	31
	Ig-G as an Acute Infection Marker?	32
	Chronic Illness Markers, IV Issues, Thyroid and T-3	33 - 44
Section 3:	Specific Agents	45
	General Information:	
	Dosing of meds in chronic infections:	
	Reactions to anti-viral medications?	
	Describing potential adverse events of therapies:	
	Germanium Sesquioxide Summary	

Glycyrrhizin (or glycyrrhizic acid or glycyrrhizinic acid) Summary for Intravenous use

Silymarin – Silibinin – “Milk Thistle”

ARTEMESIA COMPOUNDS

PolyMVA

Mushrooms in Medicine

Probiotics in Autoimmunity

Polyphenols as Modulators of Oxidative Stress in Cancer

BIOFILMS

HYDROCORTISONE PRESCRIPTION DURING BIOFILM TREATMENT

Hydrogen Peroxide Cytokine Triggering and Gastrointestinal Repair

CARNITINES

CORTISOL

DHEA AND HHV AGGRAVATION

Harvoni [ledipasvir and sofosbuvir] and other antiviral drugs with IV therapy

CHLORIDE SALTS (IV) AND LYME ILLNESS – GOOD OR BAD??

IV – OR MAINLY IV SPECIFIC IDEAS

IV Therapy Rotation in Chronic Infections

IV Bag Substitutions to Mimic NS, .45 NS, D5W etc.

SUBSTITUTIONS FOR STERILE WATER IV BASE SOLUTIONS

IV Line Flush

IV REACTIONS

Post IV Fatigue and Other Reactions

Post IVC (or other IV) Headache

IV Fluids: Saline versus Lactated Ringers – Renal, Mineral and Cardiac Sensitivity

CLEANROOM BASICS

Pediatric IV Dose and Volume Adjustments

PARENTERAL IMMUNOGLOBULINS

IV NAD Protocols

IV Hydration, Low Dose IVC and Glutathione Support

IV VITAMIN C (HDIVC, IVC, HDIVAA) Including safety, pregnancy, dosing etc.

GLUTATHIONE

Glutathione Reactions

IV Compatibility Chart

Section 4: Detoxification 141

Toxicity – Yes it is That Bad

VITAMIN A and ACCUTANE TOXICITY NOTES

HEAVY METALS AND INFECTIONS?

Ascorbic Acid and Metal Chelation

WHY SHOULDN'T I USE MY HEAVY METAL LABS VALUES?

Oral Chelation Metal Levels rising and DMSA flushing

AN OUTLINE FOR PATIENTS REGARDING WHOLE BODY CHELATION SUPPORT

Section 5: Specific Conditions 156

Pyroluria

REVIEW OF: Adrenal fatigue does not exist

AUTOIMMUNITY – CLINICAL THINKING

Chronic Fatigue Syndrome – Biology of the Muscles and Therapies Suggested

Nrf2 AND CHRONIC ILLNESS

Infectious Disease Therapies – Timing, Duration and Modifications

LYME TREATMENT STAGNATION

Amyotrophic lateral sclerosis (ALS)

Sulfur Dioxide VOG Considerations

NEUROLOGICAL INFLAMMATION, EFFECTS AND THERAPEUTIC DIRECTIONS IN CHRONIC INFECTIONS

Insomnia and Chronic Illness – Infection

The Brain on Fire: More understanding of leaky blood-brain barrier and chronic neuro-inflammation and the potential connection to cancer protection and treatment.

Understanding the neuroinflammatory response following concussion to develop treatment strategies

## NEUROSTEROIDS

PEA and Neurosteroids

## HISTAMINE

Histamine patient handout

Multiple Chemical Sensitivity, SNPs, Histamine, Inflammation and New Ideas:

MERCURY, FILLINGS AND THE USE OF METHYL-SUPPLEMENTS - Mercury Methyl B12 and Dental Amalgams is Methyl B12 safe with existing Dental Amalgams

Section 6: Natural Therapeutics Charts 200

Infection – Immunity

Inflammation

Endocrine (Thyroid and Adrenal)

Section 7: Specific Protocols 205

EBV and other Viri and Methylation Treatment

CHRONIC INFECTIOUS ILLNESS OUTLINE (ORIGINALLY PREPARED FOR THE HOSPITAL)

Patient Handout “Influenza – What to do?”

## IVERMECTIN DOSING

Antibiotic Use in Complicated Chronic Infections

Fluoroquinolone (FQ) Toxicity Potential Therapy

Hyperbaric Oxygen Therapy at AMT

Cellular and Mitochondrial Support in the Fatigued Patient

Injection Therapies for Fatigue, Recovery and Energy

Intravenous Vitamin C (Ascorbic Acid): Information for Physicians and Patients

## ATRIAL FIBRILLATION AND IV

Intravenous Ascorbate (Vitamin C) in Cancer and Chronic Infections

IV Vitamin C Reactions in EBV and HHV Patients

## IV FORMULAS

Hydration (4)

Iron Injection Protocols & Assessment – Advanced Medical Therapies

Nutrient

Neuropathy

Pain

Neuro – CV Calming

IV Therapy Supplement

\* follows page 267

HDIVC

Glutathione

Hydration

Variable Nutrient Dosing Supplement

\* follows IV Supplement

Nutrient variable dose examples

Cofactor biochemistry

Section 8: Mold

\* follows the supplements above

Dr. Anderson Hospital Mold Protocol

Black Mold Symptoms: What Happens When You're Exposed (By Dr. Tessier)

Mold Prevention 101 (By Dr. Tessier)
